

Bellanna Studio & Hairtique

pjt.2335.CWD: bellannastudio.com

We would like to provide you with one or more samples to demonstrate your project. Please note that the text and images used in our screenshots and other samples are for illustration purposes only. The actual project will contain your copy (etc. text and language) and images (e.g. photographs, logos, etc.) instead.

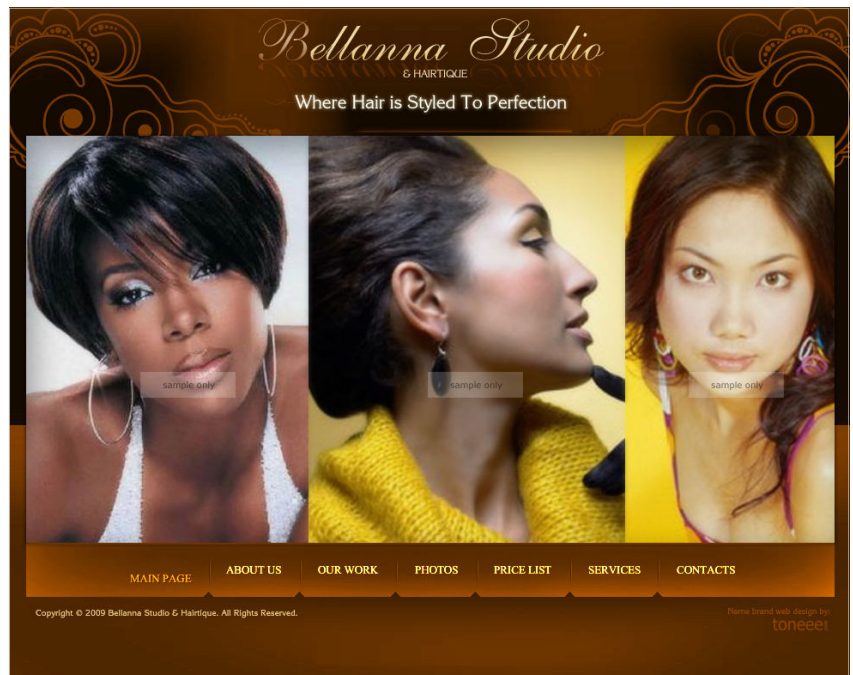

When reviewing your sample, pay special attention to the colors and layout. We can adjust to any color, but keep in mind that monitors and printers will vary slightly. If you have an exact color or font/typeface, please provide this so that we can match these elements as closely as possible.

You may direct any questions to your Account Manager or sales representative via email or telephone. Please send all instructions and specific requests or comments via email. (You may call, but we will still request the changes in writing.)

We are excited to present the enclosed samples, and ask that you provide us with written confirmation to move forward. Note that your confirmation does not necessarily mean that there won't be minor adjustments such as text and photo changes, but rather you are generally happy with the colors and layout. **Without your confirmation or feedback, we are unable to move forward.** Please respond within the next two (2) business days so that we can schedule resources to adjust or continue with your project.

Thank you,

The Design Team

A glimpse at your new website

Pursuant to our Discovery Call, this sample utilizes simple, easy to navigate interface for your site visitors. (You may safely ignore the menu bar labels and page text.) As you can see, your site will include a very modern and professional look that will align you with other major websites in your industry. We have also included an alternate color scheme (herbal green) that we prefer over the burnt orange version featured above. You may choose which version best suits your taste.

When providing photos for use with your website, try to provide the highest quality possible. Do not resize, and be sure to use only a professional. Also, if possible, take multiple photos of the same individual or style so that you can choose the best angle. (If stock photography is necessary, we can provide this for an additional charge.)
