"Office Hours" Monday - Friday
8:15 am - 12 Noon and 1:00 pm to 4:30 pm

Opportunity Description:

"See attached documents for invitation to bid, bid form, maps and sample contract".

CONTRACT PERIOD:

June 14th to October 31st, 2010

LOCATION OF WORK:

The Manning Provincial Grazing Reserve is located 5.6 km north and 6.4 km west of Manning. The locations of the 6 dugouts are located throughout the reserve as follows:

Field 5A (2 dugouts)

Field 5B (1 dugout)

Field 5C (1 dugout)

Field 10A (east dugout)

Field 10B (1 dugout)

CONTRACT: Clean 6 dugouts and install geo-grid and place gravel. All work will be paid at a per dugout rate. Geogrid is supplied by Sustainable Resource Development, but the contractor shall supply and deliver 46m³ (60yd³) of 1.5" crushed gravel to each of the six dugouts to be cleaned (276m³ or 360yd³ in total).

DESCRIPTION OF WORKS:

1. Notify Charlie Kaufmann (PGR Agrologist @ 780-835-7315) and Keith Vandemark (Manning PGR Director of Operations @ 780-836-5574), when ready to commence the project.
2. Clean 6 dugouts on the Manning Provincial Grazing Reserve using a tracked backhoe with a minimum 25 ft boom length. The tracked backhoe shall have a clean-out bucket and/or a chuck-blade attachment.
3. The dugout sides will be pulled back at a 2:1 slope and the ends at 4:1.
4. All material removed from the dugout is to be piled back from the sides of the dugout a minimum of 20' behind the hoe and landscaped/levelled. No material is to be piled in drainages that would impede flow into or out of the dugouts.
5. The contractor shall be responsible for the transportation of 6 rolls of geogrid from the SRD compound in Fairview to the worksite. Contact Charlie Kaufmann at (780) 835-7315 for access to the compound.
6. The contractor shall supply and deliver 46m³ (60yd³) of 1.5" crushed gravel to each of the six dugouts to be cleaned. The gravel is to be dumped in two roughly equal piles at each corner of one end of each dugout to allow easy access to it when spreading it over the geogrid. The total amount of gravel required is 276m³ or 360yd³.
7. The contractor shall install the geogrid mesh supplied by Sustainable Resource Development. Two widths of a 4 meter wide roll are to be placed over the entire width of one end of the dugout (stockpiled gravel end), with the top layer tied to (with plastic zip-ties) and overlapping the bottom layer by 30 cm (1'). The upper edge and sides leading to the dugout (U-shaped) is to be buried into a minimum 15 cm deep X 100 cm wide trench, before the 46 cubic meters of gravel is placed evenly on top of the mesh area. The mesh will extend into standing water as per direction

by the PGR Agrologist.

8. All dugout cleaning and geogrid/gravel installation work is contracted at a per dugout rate and will be government supervised. The supply and delivery of the gravel is contracted at a per cubic meter rate.
