Specifications for Road Repair Bid Hosley Avenue

The Town of Branford will be soliciting bids for road repairs on designated sections of Hosley Avenue. Areas will be marked out in white paint prior to beginning work and will be labeled with the word "Mill" and directional arrows. Upon commencement of the project, the Town will be providing milling services (not included in this bid proposal) and will be seeking proposals for the final patching of the road. Final asphalt thickness will be 4 ½" to be laid in two courses. The binder course shall be 3" consisting of Class IV asphalt. The wearing course shall be 1 ½" and consist of Class II asphalt. Placement of material and compaction shall be done in accordance with Connecticut State Highway Specifications Form 809. Additionally, the milled areas will be graded and compacted with a vibratory roller (10 ton min.) prior to paving. Additional material, if necessary, shall be imported and spread to bring the subgrade to a point 4 ½" below finished grade. This material shall be common fill as classified by Tilcon CT and available at the North Branford Plant, or ¾" processed stone meeting Connecticut State Highway Specifications Form 809. All edges of the milled areas are to be cleaned and dressed so as to provide a vertical surface to pave against when meeting existing pavement. Said additional material shall be provided by the Town of Branford. All asphalt will be provided by the Town of Branford. The successful bidder will be responsible for trucking the asphalt from North Branford to Hosley Avenue. Tickets for said asphalt will be handed to a Town representative on a daily basis.

Bid proposals shall all be based on a square yard basis. As noted above, this basis shall include any grading of the milled areas necessary, compaction of said areas, import of fill in said areas as required, trucking of asphalt from Tilcon CT, placement of asphalt (in two lifts) and final compaction of lifts. Coordination will be expected of the successful bidder so as to follow the milling process as closely as possible so as to minimize inconvenience and hazards to the motoring public. Hosley Avenue may be closed for only short periods of time and traffic is expected to be maintained during most of the work. The Town will provide traffic control. The minimum estimate for work to be completed is approximately 3000 square yards.
