CITY OF TEMPLE CITY
REQUEST FOR PROPOSALS (RFP)
BUILDING CODES ADMINISTRATION SERVICES
AND/OR
PUBLIC WORKS/ ENGINEERING SERVICES

INTRODUCTION:

The City of Temple City (City) is centrally located in the west San Gabriel Valley approximately five miles southeast of Pasadena and 13 miles east of downtown Los Angeles. The City is approximately 3.85 square miles and is surrounded by the cities of Arcadia, San Gabriel, El Monte, Rosemead, and unincorporated portions of Los Angeles County. The 2010 U.S. Census Bureau indicates a total population of 35,558. Temple City is predominantly a residential community with over 10,000 residential parcels.

The City is requesting proposals from qualified consulting firms to provide services related to the review of construction plans for issuance of building permits and field inspection of new construction for code compliance (Building Codes Administration Services) and/or for services related to management of City-owned infrastructure and related civil engineering work (Public Works/Engineering Services). The City has identified the need to supplement staff time and expertise for these services that are provided to the community through the Community Development Department.

Temple City is experiencing positive economic development and residential growth and is implementing an ambitious City Council directed two-year work plan. The Community Development Department's work plan includes many policy, program, and operational improvement initiatives, including implementation of a new bicycle master plan, a city-wide traffic calming plan, a downtown parking strategic plan, and the Rosemead Boulevard Safety Enhancements and Beautification Project. The requested services will facilitate implementation of these initiatives, among others.

In a continuing effort to provide the community with cost effective and quality public services, the City is seeking proposals for Building Codes Administration Services and/or Public Works/Engineering Services from qualified firms. **The consultant may propose to provide Building Codes Administration Services and/or Public Works/ Engineering Services, either one alone or both together.**

SCOPE OF SERVICES:

The requested scope of services includes comprehensive Building Codes Administration Services and/or Public Works/ Engineering Services as described below. It is anticipated at this time that such services would be provided for a one-year term with an option for a three-year extension upon successful completion of the first year.

However, services may alternatively be provided by one or more consultants on only an as-needed, supplemental or case-by-case basis, if and as determined by the Community Development Director or the City Manager. One or more consultants may be selected to enter into agreements, as needed, for either comprehensive Building Codes Administration Services and/or Public Works/Engineering Services, or for more specific project-related or other supplemental services, as determined by the City.

It should be noted that the City currently contracts with the County of Los Angeles for comprehensive Building Codes Administration Services and Public Works/Engineering Services. A scope of services that is proposed in response to this RFP should cover provision of all such services in the event that the City were to transition, fully or partially, from contracting for such services from the county to contracting for such services with one or more consulting firms.

Building Codes Administration Services. The scope of services for Building Codes Administration Services proposals shall include the following:

- ✓ **Plan Checks and Permit Issuance / Public Counter Assistance:** Assist applicants for building permits and perform reviews of construction plans for compliance with all applicable building and safety codes for the issuance of building permits, and coordinate review of construction plans by all other agencies having jurisdiction concerning the implementation and enforcement of building, fire, health, safety, sanitation, air quality, and all other applicable codes. Providing these services would entail consultant staff presence at the Temple City municipal building to provide “over-the-counter” information and plan-checking services (when feasible and warranted) directly to the public for an average of ten hours per week, or as otherwise determined by the City, as well as being available at other times for scheduled meetings at City offices and for telephone or written (generally by e-mail) responses to questions from City staff or from the public upon referral from City staff.
- ✓ **Inspections:** Conduct inspections of all phases of construction for compliance with approved plans and all applicable codes including but not limited to those relating to structural integrity, fire and life safety, electrical, plumbing, heating and air conditioning, as well as energy conservation, handicapped access, and site work. Inspection services will also cover enforcement of compliance with conditions of approval, provisions of City ordinances, and the requirements set forth on the plans for which the permit was issued.
- ✓ **Enforcement:** Enforce compliance with all building and safety codes including but not limited to electrical, plumbing and mechanical codes, and arrange reviews and coordinate enforcement by other agencies or City staff as necessary. The City may consider appointing the consultant to act as the Building Official.
- ✓ **Records:** Maintain records and files concerning construction permits and building code administration at the Community Development Department or at such other locations as approved by the Community Development Director.

- ✓ **Reporting:** Keep daily logs of building permit and inspection activities and submit an itemized monthly report of all service activities to the Community Development Director. Reports to other agencies shall also be submitted as required by law, including development activity reports as required for compliance with the Los Angeles County Congestion Management (CMP) Program.

Public Works/Engineering Services. The scope of services for Public Works/Engineering Services shall include the following:

✓ **General Administration**

- Review plans and issue City permits when required and warranted for any proposed construction work or other physical modification within the public rights-of-way, and also including but not limited to any proposed right-of-way encroachment (temporary or permanent), and proposed temporary street closures.
