

Our company is developing a touch screen device for the medical market. We have an immediate requirement of 4000 units and a follow up requirement of more than 7500 units.

For this device we have an urgent need to source a 12.1" wide format (16:9) multi-touch P-cap touch screen.

The desired specifications are:

- 12.1" Wide format (261.12x163.2mm active area)
- Multi-Touch (Minimum 2 touch)
- USB interface preferred (i2c or SPI are acceptable)
- Will work with 1.5mm protective cover glass.
- Fast update rate >100Hz

Are you able to offer a touch screen sensor and controller that meet these specifications?

We are behind in schedule to meet our obligations to our customers and need to get one or more samples as soon as possible. Please call me any time of day or night at my cell phone number below.

Best Regards,

Jonathan Frank
