Section 1 - General Information

NOTICE: Notice is hereby given that proposals will be received by the City of Bellevue, Washington, for **RFP # 10355 - SR 520 Interim Regional Pedestrian and Bicycle Path** by filing with the City at the above location.

BACKGROUND INFORMATION:

The City of Bellevue is partnering with the Washington State Department of Transportation (WSDOT) to build sidewalks and bike lanes along both sides of Northup Way in an effort to connect the NE 24th Street terminus of the existing SR 520 regional pedestrian and bicycle path with 108th Avenue NE where a new regional pedestrian and bicycle path will be built by WSDOT as part of the SR 520, Medina to SR 202: Eastside Transit and HOV Project. Final design may also include a center turn lane and planter strips along Northup Way.

The 2008 Northup Way Corridor Study outlines the City of Bellevue's preferred design for Northup Way and includes a center turn lane and planter strips. The preliminary design will compare cost estimates and design/construction schedules for a project with and without a center turn lane and planter strips. The final design and construction stage will begin after the City of Bellevue and WSDOT reach consensus on the scope of work. The final design will be performed as a contract supplement.

This project supports the non-motorized goals outlined in the 2009 City of Bellevue Pedestrian and Bicycle Transportation Plan Report. This project will also serve as an interim regional non-motorized facility for WSDOT as it completes the rest of its planned improvements along SR 520. Consequently, construction of this project must be completed by the end of 2014 or sooner.

The City of Bellevue will act as lead agency for this project.

Once the City and Vendor have reached an agreement on the scope of services, a final contract will be prepared by the City. The foregoing should not be interpreted to prohibit either party from proposing additional contract terms and conditions during the negotiations of the final Contract. If the selected Vendor fails to sign the Contract within ten (10) business days of delivery of the final Contract, the City may elect to negotiate a Contract with the next-highest ranked Vendor. The City shall not be bound, or in any way obligated, until both parties have executed a Contract. No party may incur any chargeable costs prior to the execution of the final Contract.

SCOPE OF WORK

Develop preliminary design for roadway widening to add sidewalks, bike lanes, and a potential center turn lane. This work includes providing cost estimates, environmental and other discipline reports, permit application materials, exhibits for stakeholder negotiations and right of way acquisitions. Construction of the sidewalks and bike lanes must be completed by the end of 2014 or sooner.

The preliminary design will compare cost estimates and design/construction schedules for a project with and without a center turn lane and planter strips. The final design and construction stage will begin after the City of Bellevue and WSDOT reach consensus on the scope of work. The final design will be performed as a contract supplement.

A preliminary list of challenges for this project includes:

- NE 24th Street between the existing SR 520 regional pedestrian and bicycle path and Northup Way has existing bike lanes and sidewalks on both sides of the road. A decision will be made whether to rely on these improvements or extend the regional pedestrian and bicycle path down to Northup Way.
- The improvements pass over the Burlington Northern railway. Earlier studies recommended widening the existing bridge over the railway on the north side of the structure. Structural design work is therefore anticipated.
- The improvements pass underneath I-405 and should be designed to fit underneath the existing bridge structure.
- The improvements will pass over Yarrow Creek. Culvert work related to fish passage and seasonal construction restrictions are anticipated. Environmental documentation and clearances will be required including consultation with Tribal Nations.
- The design should identify minimization and avoidance measures for the natural and built environments. Natural Drainage Practices should be incorporated where feasible.
- Construction must be completed by the end of 2014 or sooner. Schedule and cost will be monitored closely and reported regularly to WSDOT. The consultant will be expected to identify innovative design and management solutions to project cost and schedule challenges.
