#	Question	Response
AMENDMENT # 001		
1	Would you consider allowing more than 12 pages in the proposal beyond resumes and title page.? When you have sub consultants for mechanical, electrical, structural, architectural etc. it takes more than 12 pages to answer all of the questions in the RFP in a responsive manner	We will allow up to 15 pages to be submitted.
2	In addition to excluding resumes and exhibits (licenses and/or registrations, and the signed Representations and Certifications), we request the following also be considered for exclusion: a) Title Page; b) Letter of Transmittal; c) Table of contents; d) Introduction section, which responds to the Minimum Requirements.	Agreed. However, Introduction is to be limited to 3 pages.
3	In regards to the requirement for a list of current projects under "Proposal Content and Requirements #7 Capacity to Respond", may we limit the list to only projects with a fee over \$50,000? Would this list be included in our total allowable page count?	The list of projects can be limited to those with a fee greater than \$50,000 and can be limited to those that the A/E's key personnel and/or team members are working on. This listing should be included as an exhibit to the proposal.
4	In regards to the Minimum Requirements "Principals and project manager of the architectural and engineering firms are currently registered in the State of Alaska". Would it be possible to alter the qualification to require an Architect/Engineer registered in Alaska work on the ANTHC projects, and to be the sealing Architect/Engineer and executive Project Manager, rather than every Principal and Partner of the firm be licensed in Alaska?	Revise the first bullet of General Information - Section 5 (Minimum Requirements) to: ~The sealing Architect/Engineer and executive project managers of the architectural and engineering firms are currently registered in the state of Alaska.
5	Is it an architectural lead or engineering lead? The RFP sounds like more engineering than architectural work.	We haven't specified architectural or engineering lead. It could be either, though the majority of the work will most likely be engineering
6	Can you tell us who had this contract last? Would it be possible to know the contract values for the past 3 top prime contractors for the previous term?	Larsen Consulting Group, CRW Engineering Group, USKH. The annual contract value has been approximately \$1.5 - 2.0 million.
