

*In 2009, the Nuckolls Fund for Lighting Education intends to award three grants: the **Nuckolls Fund Grant**, which has been given annually since 1989 for programs at the college level; the **Edison Price Fellowship Grant**, which is given to individual educators to enable them to further their own education; and the **Lesley Wheel Introductory Lighting Program Grant**. The Fund is also offering the option of submitting a proposal that does not fall into one of those three categories. Please see separate Requests For Proposal for the Nuckolls Fund Grant and the Edison Price Fellowship Grant. **Proposals are accepted only from educators at academic institutions in North America.***

REQUEST FOR PROPOSAL:

The Year 2009 Lesley Wheel Introductory Lighting Program \$20,000 Grant

The Nuckolls Fund for Lighting Education is a not-for-profit organization that uses income from its endowment to fund educational programs in the field of lighting. It was established to honor James L. Nuckolls, a pioneer in lighting education programs during the 1970s and 1980s. Since then, additional contributions have been made in memory of Edison Price, another innovator and inventive lighting master, and Craig Roeder, a well-known lighting designer who had his start working with Jim Nuckolls.

This RFP is directed to programs in Architecture, Engineering, Technology and Interior Design that have either *minimal or no lighting design offerings* in their curricula now, but have a strong interest in adding them. The program may currently have a portion of a course that touches on the lighting field, but the material is minimal or recognized by the program as being inadequate for today's graduates. There must be available, however, a faculty member with a basic knowledge and understanding of lighting. The Fund is not able to help a program without faculty knowledge to start from ground zero in developing lighting courses.

The goal of this grant is to have a new, viable, and sustained lighting fundamentals course established and on-going in your program. We hope that this opportunity will open new doors at your institution and enhance lighting education in your unit. We know that ideas which receive outside financial support are more favorably looked upon by school administrators, and help faculty in their professional advancement. This award may be the incentive to start a quality lighting program at your institution. We look forward to receiving your proposal.

The Fund wishes to make it clear that in the event that no submitted proposal is deemed worthy of support, this category of funding will be withdrawn for this year. The Fund reserves the right to award this grant in an amount less than \$20,000

CRITERIA FOR FUNDING

1. We will fund new course(s) that cover lighting in the fields listed in #2 below. Evidence should be included of how the proposed course(s) will enrich, enhance and integrate with the existing academic program in which it is placed. A proposed course outline must be included, and instructor credentials shown. It is required that the author of the proposal be the instructor or on the course instruction team.
2. The academic unit should be in one of the following areas: Architecture, Engineering, Technology or Interior Design. It must have academic accreditation in its field. The unit must offer a four to six year academic degree program.
3. The proposed course(s) must be given at least twice during four sequential academic years. Additionally, the Fund requires evidence from at least two academic administrators (Chairs, Directors, Deans etc.) that the administration will support the continuation of the course after the grant period ends.
4. The total amount requested may not exceed \$20,000. The RFP budget outline must reflect how the money will be spent over four years, as The Nuckolls Fund will allocate the money at a maximum of \$5,000 per year. The first year budget should be specific. Subsequent yearly budgets are to be included in the required annual reports.

5. At least one of the primary course instructors must be tenured or on tenure track status with the institution. In the event that the original instructor(s) leaves the institution, the Fund reserves the right to request evidence of knowledge and interest in lighting from the new tenure track instructor(s) for continued funding. In that event, the Fund would also require that an academic administrator designate a new contact person for the required reports.
6. Evidence that the proposed instructor(s) is knowledgeable and active in lighting is important. This may be shown by vita indicating lighting content in previous courses given or taken, activity in IESNA or IALD, lighting workshops attended, and so on.
7. The Fund is interested in introductory courses that cover a broad range of basic lighting as applied in your field of study. A narrow specific course, such as a course in only daylighting or only computer applications, will not be given consideration. Narrow focus courses are covered in the other Nuckolls Fund RFP for institutions that have existing basic lighting courses.
8. The course should be a minimum of 3 semester credits or 4 quarter credits, and must be given at least twice during the grant period. At least eight students should complete the course each time it is given (evidence must be shown that this condition is met for continued funding). Courses which are required are preferred to ones which are elective, but this is not an absolute. Interdisciplinary courses are always of interest.
9. Up to \$2,000 per year of the Fund award may be used to purchase lighting-related equipment for the course. In-kind donations of equipment from lighting manufacturers are encouraged. The proposal should indicate that the institution will provide appropriate space.
10. No portion of the fund budget may be used to cover overhead costs. Benefits are allowable.
11. Reports will be required periodically from the proposer or subsequent persons responsible for the course. A minimum of one annual report, due one month after the course has been given, must be submitted. In the report the completed course should be reviewed and evaluated both academically and in terms of the budget. Academic course evaluations from the students are required as a part of this report, but they may be delayed until the following semester to accommodate institutional turnaround time. If your institution has no regular student evaluation process, the course instructor must develop one for this course alone. The Nuckolls Fund requires on-time, complete, high quality reports in order for funding to continue from year to year.

Required Submission Information – The Year 2009 Lesley Wheel Introductory Lighting Program \$20,000 Grant

Electronic submission is preferred. Because proposals must be re-sent to 12 Board members with a variety of e-mail capabilities, we **require** that submitters conform to the following specifications:

- Proposals must be submitted in either Microsoft Word or PDF format.
- All material submitted must be consolidated into one document that totals a maximum of 25 pages. This includes the proposal itself, supporting letters, resumes, and photos, if any. Resumes must be no more than one page each.
- Use a minimum of 12 point type. Some reviewers will read proposals from their computer screens.
- **Please try to keep the total document to under 1 mb in size.** Photos should be jpeg format only.
- E-mail to: nuckolls@nuckollsfund.org.

If hard copy must be submitted, contact the Fund before February 2nd at info@nuckollsfund.org for mailing instructions.

Proposals must be organized as follows:

1. Title page, listing:

- The title of the grant proposal
- The name of the person submitting the application and his/her position and tenure status at the school.
- Name of the college or school and name of the department or division
- Mailing address, phone and fax number
- Name of the program to which the grant will be applied
- Number of years the program has existed.

2. Contents page

3. A one paragraph abstract of the proposed project

4. Background information that will put the project into context, including a description of the department (division) and the program.

5. Substantive description of the project for which funding is sought. Describe why the project is needed, how it will fit with the existing program, what its impact will be on lighting education, what makes it of special importance, and how it will be continued after the grant period.

6. A detailed budget showing how the funds will be allocated to accomplish the various tasks in the proposed project. If supplementary funding from another source is needed, include documentation showing that source's commitment to provide funds. Any financial support by the institution should be shown.

7. A schedule for accomplishing the tasks. Include dates and describe major milestones. Two reports per year will be expected. Grant funds will be paid in installments upon the Fund's acceptance of each report.

8. At least two letters of support from deans and/or department chairs.

9. Resumes for those administering the grant (maximum of one page each).

Optional Submission Material.

- You may include letters of support from practicing lighting professionals who can provide insight into the need for the project and the qualifications of those who will carry it out.
- If you submit in hard copy, we suggest that you enclose a SASE (self-addressed stamped envelope) for our use in confirming receipt of your proposal. If you do not receive our confirmation by February 16, please contact us. Electronic submissions will be acknowledged via e-mail.

Other Information

<i>Proposals due</i>	February 2, 2009 (postmark and e-mail date)
<i>Send to</i>	nuckolls@nuckollsfund.org (electronic submissions). Contact the Fund at info@nuckollsfund.org for instructions on mailing hard copies.
<i>Grant announced</i>	May 5, 2009 at the Nuckolls Fund luncheon, LIGHTFAIR International, New York, NY.
<i>Notification</i>	All those who submit proposals will be notified of the recipient. Submissions will not be returned.
<i>Agreement</i>	The fund requires grant recipients to sign a performance agreement and to submit status reports. Published results of grants funded by the Nuckolls Fund enter the public domain. Grant awards do not imply any form of endorsement by the Nuckolls Fund.
<i>Fee</i>	There is no fee for submission and no limit to the number of submissions.
<i>Restrictions</i>	No portion of the funds awarded may be used for indirect costs (overhead). Benefits are allowable.
