

Request for Proposals: Party Endorsements Web App

The Working Families Party of New York is looking for a custom built application that integrates with Salsa. The WFP is a progressive third party that endorses hundreds of candidates state-wide.

INPUT: Name and address. (Polling station data is available online with an open API.)

OUTPUT: list of endorsed/recommended candidates and your polling station.

Notes:

- * Our website is built with Wordpress.
- * Deadline for proposals: none. This announcement was sent on July 7, 2009.
- * Completion date: August 31, 2009.
- * Output should be an attractive, print ready page using our existing look/feel.
- * Input should integrate with Salsa, so that address changes are made if necessary, along with a tag indicating that the page was used.
- * Endorsement data is from a spreadsheet we provide. Not every race will have an endorsement, and races where we don't have a candidate do not need to be listed.
- * This task is appropriate for well established firms as well as freelance consultants. Applicants from within the progressive political and nonprofit world are preferred.
- * Applicants should be in touch before submitting a full proposal.
- * Visit www.workingfamiliesparty.org to learn more about the WFP.
